

EVENT SPONSORS

It is the goal of Upper Miami Valley Science Days that all 2024 District 1 Science Day events be held in-person. Virtual on-line judging will only occur if governmental and/or host institutional restrictions prevent large in-person events from taking place in February and March 2024.

Organization and planning for a Science Day begins months in advance. There are a number of expenses involved in preparation as well as the day of the event. We provide printed and digital instructional and support materials to teachers and students, and supply project posters, awards, ribbons, and certificates for student projects, badges for students and judges, refreshment for all participants, and there are other event supplies required. Donations from sponsors provide for these expenses.

Please consider any size donation to fund this year's Science Day events. To sponsor one or more event(s), please complete the attached form.
